

The following table offers a comparison of the six different sermon encoding plans offered by audioposting. There are two varieties of the Encoding/Uploading Only Plan and four varieties of the Total Management Plan.

- The **Encoding/Uploading Only Plans** (EUO) are recommended for ministries planning to submit **LESS THAN 2** messages per week for SermonAudio.com.
- The **Total Management Plans** (TMP) are recommended for ministries planning to submit **2 OR MORE** messages per week for SermonAudio.

Broadcasters using audioposting to process their messages are encouraged to save on postage by mailing quantities of tapes in a single package. However, unless instructed otherwise, we will always upload messages at a rate of two per week.

Let us put your sermons on SermonAudio.com

¹ SermonAudio charges "extra message fees" if more than 2 messages are uploaded per week. "Unlimited" refers to audioposting's services. "Extra message fees" will be passed along to the broadcaster.

² Effective cost is for encoding/uploading services. SermonAudio fees are not included in this calculation.

³ Effective cost per message with TMP is based upon submitting 2 messages per week (See note #1 above).

⁴ TMP Monthly plan requires authorization for an automatic charge to your credit card each month. All other plans can pay by check or credit card.
